The Orvis Guide to Hatch Strategies
Successful Fly Fishing for Trout without Always Matching the Hatch
BY TOM ROSENBAUER, FOREWORD BY TOM BIE
One of the most studied yet intimidating aspects of fly fishing for trout is an understanding of insect hatches. This unique book teaches fly fishers enough entomology to be successful, and instead of focusing on insect identification, it stresses learning how to approach trout, how to find where they feed, and how to present the fly so it is accepted as natural food. Published in association with The Orvis Company.

“The Orvis Guide to Hatch Strategies is a strong effort by Tom Rosenbauer to help the fly angler understand insect hatches and how to fish them. The book also has a good section on how to choose a fly and present it to the fish. Overall, this is a strong effort to help the fly angler understand hatches and how to present flies to the fish.” —Gray’s Sporting Journal

The Orvis Guide to Finding Trout
BY TOM ROSENBAUER
In full color, The Orvis Guide to Finding Trout is a brand-new book from Tom Rosenbauer and the Orvis Company. Most beginners (and many experts) are mystified when faced with a new river or changing conditions on their home river. And if they can’t predict where trout might be, they lose confidence and fish poorly. This book is about how to find trout in all types of water, at all seasons. But it’s also about what methods and flies may work best in each water type. There is also a concluding chapter on Ten Trout Myths, which are mostly related to where trout are found and how to approach them.

Western Waters
Fly-Fishing Memories and Lessons from Twelve Rivers
BY TOM ALKIRE
In this collection of essays about Western waters, Tom Alkire blends how-to, where-to, and natural history with lyrical prose and a deep insight that only comes with knowing a place well. From rainforest rivers to desert rivers, from tidal rivers to those along the Continental Divide, the author has waded and fished these waters over the decades. Along with his fishing adventures, the book also looks at geography, early explorers, and the modern-day impacts on the rivers themselves.

“In Western Waters, Tom Alkire has given voice to the region’s rivers so that one not only hears the loud splash of a jumping steelhead, but also the soft song of a meadow lark or a deer stepping lightly out of thick brush along their banks. Take your time and enjoy every page with Tom as he takes you on a wonderful trip along his favorite waters.” —Rick Hafele, coauthor, The Complete Book of Western Hatches

Casting Forward
Fishing Tales from the Texas Hill Country
BY STEVE RAMIREZ, FOREWORD BY TED WILLIAMS, ILLUSTRATED BY BOB WHITE
In Casting Forward, naturalist, educator, and writer Steve Ramirez takes the reader on a year-long journey fly-fishing all of the major rivers of the Texas Hill Country.

This is a story of the resilience of nature and the best of human nature. It is the story of a living, breathing place where the footprints of dinosaurs, conquistadors, and Comanches have mingled just beneath the clear spring-fed waters. This book is an impassioned plea for the survival of this landscape and its biodiversity, and for a new ethic in how we treat fish, nature, and each other.

“These words are incredibly honest, gritty, and melodic…sometimes rowdy, always soulful. Steve Ramirez has an uncanny knack for conveying the 360-degree perspective of fly fishing like only an author who has seen so much—and felt so much—can. He’s an angling balladeer.” —Kirk Deeter, Editor-in-Chief, Trout Unlimited/Trout Media

Casting Onward
Fishing Adventures in Search of America’s Native Gamefish
BY STEVE RAMIREZ, FOREWORD BY CHRIS WOOD, ILLUSTRATED BY BOB WHITE
In writing Casting Onward, author Steve Ramirez traveled thousands of miles by plane, motor vehicle, boat, and foot. The focus is the author’s extension of Casting Forward by fishing for native fish within their original habitats, and telling the story in part through the eyes of the people who have lived alongside, and come to love, these waters and fish. It is a story of fishing and friendship - a story of humanity’s impact on nature, and nature’s impact on humanity.

“With Casting Onward, Steve Ramirez has crafted a beautiful meditation on the natural world and our relationship to it. Though Steve describes the various perils of neglecting either, he is, like all anglers, an optimist. By the time you reach the end of this splendid, heartfelt book, you’ll be one, too.” — Monte Burke, author of Lords of the Fly and Saban
Casting Seaward
BY STEVE RAMIREZ
In Casting Seaward, the author, naturalist, and educator Steve Ramirez expands beyond the geographical scope of his first two books by traveling thousands of miles by plane, motor vehicle, boat, and foot pursuing the native gamefish of North America’s salt and brackish water habitats. This journey includes following anadromous fish like salmon from the ocean’s depth to the shallowest tributaries of Alaskan rivers and following rivers and streams from their freshwater sources to their brackish water deltas. Casting Seaward is an enthralling exploration, an insightful warning and call to action, and an exceedingly hopeful story. It is a story of fishing and friendship. It is a story of humanity’s impact on nature, and nature’s impact on humanity. It is our story, in this pivotal moment in the history of humanity and the living blue planet we call home.

The Delaware River Story
Water Wars, Trout Tales, and a River Reborn
BY LEE HARTMAN
One of America’s most important rivers, the Delaware River provides clean drinking water to every home within a 150-mile radius. When its reservoirs were built, they disrupted the natural flows and turned nature upside down. The once-warm waterway’s now cooler flows created a self-sustaining wild trout population and established a modern-day fishing industry to fuel the economy of Upper Delaware River communities. Protecting this important waterway has been a daunting task; this book celebrates the individuals and organizations sacrificing their time and effort to keep the river healthy and free.

“Hartman offers the full sweep of the Delaware’s story, and makes the case for its protection as a historically and ecologically important river that just happens to host a wild trout fishery that’s unparalleled east of the Mississippi.”—David Kinney, Eastern Policy Director, Trout Unlimited

Having angled for and caught dozens of different species of fish, McCormick dryly comments, “Some were more sport to catch than others, but I assert that all fishing is good, though some is better.”

Cicada Mania
Timing, Fishing Techniques, and Patterns for a Super Hatch
BY DAVE ZIELINSKI

Yearly emergences of cicadas are consistent and plentiful in certain places, and fish key in on them when they fall into the water and become easy meals. Everything from carp and smallmouth on Eastern rivers to trout on fabled waters such as Utah’s Green River grow fat on this annual feast. But the feeding frenzy kicks into high gear every three or four years when periodical cicadas emerge. Even fish that are not designed to feed on the surface, such as carp and freshwater drum, contort their bodies to be able to take part in this daily buffet that last for about a month. Anglers can follow this hatch and fish cicadas for two or three months, and if they understand what broods are hatching where, can fish cicadas almost every year if so inclined. This is the first book dedicated to the patterns, techniques, and more importantly, the science of locating the best hatches of these insects.

South Florida’s Fishing Paradise
Early Adventures Fishing from Alligator Alley to Boca Grande
BY JIM STENSON

Author chronicles his fishing adventures from Sanibel to the tarpon capital of the world—Boca Grande—to rivers like the Manatee River and the Caloosahatchee River, which teemed with fish. In addition to being an immensely entertaining read with a colorful cast of characters, this book has a strong environmental message and is a cautionary tale about the loss of over seven million acres of pristine wetlands, the explosive growth of the sugarcane industry, the abomination of large-scale citrus farming, the foolhardiness of removing the oxbows and dredging Kissimmee River, and the damaging effects of damming and diking of Lake Okeechobee.

The Tug Is the Drug
BY CHRIS SANTELLA

These thirty stories take readers from leaping makos near the fairways of Torrey Pines to midnight Atlantic salmon fishing on the fabled Ponoi to encounters with very friendly mujeres on the streets of Havana . . . and even offer an unauthorized (yet unequivocal) account of Bob Dylan’s 1970s obsession with fishing. Santella’s peripatetic lifestyle and eye for entertaining details--even those that have little to do with the act of throwing flies at fish--will make you look at fishing in a whole different way.

“Some fly-fishing books are not meant to be technical but rather to entertain and delight. Santella’s well-written short stories are about our passion: its anglers and fascinating essays. You will enjoy this one.”—Lefty Kreh, fly fishing legend and author of numerous books, including Casting with Lefty Kreh, Fly-Casting Fundamentals, and 101 Fish

The Greatest Hunting Dog Stories Ever Told
EDITED BY LAMAR UNDERWOOD
All dogs live forever in the hearts of their owners, but hunting dogs take that love to ultimate dimensions of affection. The dogs and their owners have worked together to obtain skills and understanding of the outdoor world where they thrive. For many hunters, the work of the dog in the field is the real purpose of the hunt. The simple pursuit of a gamebird or animal is not the purpose of going afield. The dog work—the radar-nosed probing of cover, the searching gait to check out fields, the retrieving of downed birds—moments spent in these elements are the real reason hunters have bonded with their dogs. The stories here are real accounts of hunting dogs in action. The dogs may be gone now, but the affection they provided and their performances in the field are everlasting treasures.

A Fully Illustrated Guide to Creating Arrowheads, Axes, and Other Early American Implements
BY MONTE BURCH
Here is the most comprehensive guide to making your own Native American tools and weapons. This reference takes you through the steps of the basic flint-knapping of arrowheads and scrapers to the most complex decorating and finishing techniques of painting and fletching. Fully illustrated with photographs and line illustrations, this is the perfect book for the survivalist, historian, student, or Native American enthusiast.

“Going through this book is a lot like attending one of those summer mountain man rendezvous. It’s a great lesson in the appreciation of modern convenience and comfort.” —Statesman Journal
Step richly into the animal world by discovering what their tracks tell you about their purpose, mood and individuality. Learn to understand an animal’s current behavior and choices through the context of its biology and the tracks it leaves behind. From decades of field research and teaching tracking to thousands, expert tracker Jim Lowery leads you to confident identification of tracks and into a deeper relationship with animals and their habitat, using many examples, tips, and focused notes written specifically for field exploration.

There’s a Porcupine in My Outhouse
The Vermont Misadventures of a Mountain Man Wannabe
BY MICHAEL J. TOUGIAS
NATURE BOOK OF THE YEAR
Sequel to the author’s new book, The Waters Between Us (Lyons, March, 2021), about growing up loving the woods and fields and streams of his native Massachusetts and wanting since boyhood to live like a mountain man in the woods. Having acquired a forest cabin in the course of the first book, There’s a Porcupine in my Outhouse details his further adventures hunting and fishing far from other humans. Here are Michael Tougas’ adventures at a tiny A-frame cabin in Northern Vermont where he learns that nature has a way of becoming our instructor. This funny, honest, and personal account is the perfect book for anyone who loves the outdoors and loves to laugh.

“Thereagias recounts his experiences with candor and humor. He blends the adventures of Lewis and Clark with the vision of John Muir.” —Cape Cod Times

Recent Hunting Trips in North America
BY FREDERICK C. SELOUS

Experience a first-hand account his first moose hunt in Canada, along with adventures in caribou hunting in Newfoundland and the Yukon Territory. He was accompanied by B&C members, Charles Sheldon, William Osgood, and Carl Rungius throughout his adventures.

Gunfitting
Achieving the Ideal Fit for the Game and Clay Shot
BY DON CURRIE
Expert shooting coach, teacher, and competitor Don Currie delivers a solid book on gunfitting based on a lifetime of experience gained from working with Orvis and Purdey. Don knows that shooting with a properly fitted shotgun is critical to a shooter’s success, and he delivers on the art and science of fitting proper shotguns. The science requires the gunfitter to understand the structure of the shooter’s body and what stock specifications are needed to accommodate the shooter’s physique. To master the art of the process, the fitter must understand how shooters shoot and how the eye and brain see and read the target. The fitter must critically evaluate the shooter’s stance, mount, and level of experience along with taking into consideration the shooter’s discipline and style and how the shooter will develop and evolve.
